

Introduction

Diabetes mellitus is one of the leading non-communicable diseases worldwide, with a rapidly increasing prevalence due to lifestyle changes and metabolic risk factors.

Timely and accurate glucose monitoring is essential to prevent disease progression and reduce long-term complications.

Uncontrolled diabetes can result in severe conditions such as cardiovascular diseases, nephropathy, and neuropathy, significantly impacting quality of life.

Traditional diagnostic methods like fasting glucose and HbA1c testing are standard but may not effectively detect early or asymptomatic cases.

Therefore, there is a growing need for intelligent, accurate, and secure diagnostic systems to support modern healthcare diagnostics.

VELAMMAL
INSTITUTE OF TECHNOLOGY

Chennai - Kolkata Highway, Panchetti, Ponneri - 601 204

**6th International Conference on Artificial Intelligence,
6G Communications and Network Technologies - ICA6NT 2026**

Certificate of Participation

This is to certify that

SURYA PRABHA R

E.G.S. Pillay Engineering College

has presented a paper titled

**Blockchain-Integrated Decentralized Ai Architecture For High Accuracy Blood Glucose
Prediction**

**in the 6th International Conference on Artificial Intelligence, 6G Communications and Network
Technologies (ICA6NT 2026) organized by the Department of Electronics and Communication
Engineering, Velammal Institute of Technology, Chennai held on 25th & 26th, March 2026.**

Coordinator
Dr. R. Jothi Chitra
Professor-ECE

Coordinator
Dr. M. Sivarathinabala
Professor-ECE

Coordinator
Mr. K. Ragupathi
Assistant Professor-ECE

Convener
Dr. B. Sridevi
Professor & Head -ECE

Conference Chair
Dr. N. Balaji
Principal
